**INNOVATIVE ENGINEERING E-NEWS BYTE:**

## **INNOVATIVE-Engineered community wins national award for excellence**

**TOMS RIVER, NJ** –the Community Center of Four Seasons at Mirage, located in Barnegat, NJ, won the National Association of Home Builders 2003 Best of Seniors Housing Design Award in the Active Adult Communities category. The project was designed by INNOVATIVE ENGINEERING. The community was developed and built by K. Hovnanian Companies, Edison, NJ.

The NAHB Seniors Housing Council held its 2003 Best of Seniors Housing Design Awards ceremony on Jan. 21, 2003, during the International Builders' Show in Las Vegas, NV. The awards program recognized architectural and interior designs that brought quality, innovation, and spirit to the 55+ housing industry. A 12-member panel of noted professionals in the 55+ housing field, including builders, architects, designers, and gerontologists, judged entries and presented 52 gold and silver awards to existing and "on-the-boards" projects in 25 categories, including active adult, independent living, and service-enriched categories. In addition to looking at the overall community and design, awards cited excellence for the community center, common area, interior design, model merchandising, and more.

Projects were judged on how effectively they responded to the housing demands and design needs of the burgeoning 55+ market as well as their overall success in meeting the distinct lifestyle requirements of mature consumers. Other criteria included the project's marketability, budget, and the ability to work on a challenging site, to name a few.
