FOR IMMEDIATE RELEASE
INNOVATIVE ENGINEERING E-NEWS BYTE:

INNOVATIVE completes over 2000 UMTS Audits in 2005

TOMS RIVER, NJ – UMTS (Universal Mobile Telecommunications System) is 3G wireless standard implementation based on the GSM technology to provide data transfer rates of 144kbps for vehicular traffic, 384 kbps for pedestrian traffic and up to 2 Mbps for in-building systems. Innovative was retained by various carriers to provide full site audit services and design for rapid market deployment within PA, MD, DE, NJ and NY.

Innovative Engineering is known for their project scalability and proven track record in completing large telecommunication deployment projects within tight timescales. An example of this was the completion of over 650 audits in New York City in only nine weeks, which was one week ahead of schedule.

For more information, contact Innovative Engineering at 732-240-4400 or log on to the company's website at <http://www.InnovativeEngineering.net>.
